THE IAEA SAFEGUARDS STATE DECLARATIONS PORTAL

The portal offers States and regional authorities a secure and efficient method to submit declarations and communicate with the Department of Safeguards. The portal keeps track of communication while reducing paper-based processes and manual data entry to save time and effort for all.

By employing a layered approach to security, including two-factor authentication and end-to-end encryption, the portal applies the latest controls in information protection.

The portal is available to use for the submission of:

• Nuclear Material Accounting Reports

• Additional Protocol Declarations

• Requests for termination, exemption and re-application of safeguards

• Voluntary Reporting Scheme reports, etc.

As of November 2019, 61 State and Regional Authorities have submitted their declarations using the State Declarations Portal. *Join SDP today.*
