

Grace Stanke

Advocate for nuclear energy through her social impact initiative “Clean Energy, Cleaner Focus”, USA

Grace Stanke is the current Miss America and graduate of the University of Wisconsin-Madison, where she studied nuclear engineering. She is an advocate for clean energy and inspiring the next generation of engineers. During her year as Miss America, she is traveling the country using her national platform to advocate for “Clean Energy – Cleaner Future.”

Encouraging worldwide change for clean, zero-carbon emission energy sources, Miss Stanke emphasizes the benefits of nuclear power and seeks to dispel the myths around nuclear energy while inspiring the next generation of female scientists, engineers, and mathematicians.
