

Paulo Eduardo Artaxo Netto,

Professor, Applied Physics Department, Institute of Physics, University of São Paulo, Brazil

Prof. Paulo Artaxo has worked over the last 30 years on research associated to global climate change with a focus on the role of aerosols and clouds on the planet energy system. He is a leading researcher on the role of Amazonia in climate change and in the land use change processes in tropical regions. He was a leading author in IPCC AR4 and AR5 Assessment reports and is a lead author on the ongoing IPCC AR6 Report. He is one of the most cited Brazilian researchers and have more than 450 international publications..
