

Liu Luxiang

Professor at the Institute of Crop Science of the Chinese Academy of Agricultural Sciences, China

Luxiang Liu is a Professor at the Institute of Crop Science of the Chinese Academy of Agricultural Sciences. He has a long track record of research on methodology of induced mutations and biotechnology for crop improvement. He has also been involved with the IAEA RCA Program on plant breeding since 2002 and served as an IAEA expert. Mr Liu has functioned as a Member of the Project Advisory Committee, as well as Course Director, on numerous occasions, and is currently the Lead Country Coordinator of the RCA Projects on Plant Mutation Breeding. He is the Winner of the Achievement Award in Plant Mutation Breeding by the Joint FAO/IAEA Division in September 2014. His presentation for this Scientific Forum is on adaptation in crops, with focus on the challenges of crop production under changing climate conditions and unlocking the potential of mutant crops for sustainable agriculture.
