FOREWORD

The *INIS List of Journal Titles* (IAEA-INIS-11) is published annually and includes the titles of all journals containing articles submitted to INIS at the time of publication. The current *INIS List of Journal Titles*, January 2020, contains 17 544 journal titles, including 1139 which are Open Access¹, from 108 Member States and 13 international organizations.

A journal — or periodical — is a continuing publication issued in a succession of discrete parts, usually bearing numbering and/or chronological designations and intended to be continued indefinitely. It is generally published within a defined, fixed interval between issues and normally appears more than once per year. It includes a mixture of articles, letters, summaries, etc. Within this definition, annuals such as the *Annual Review of Nuclear Science* are included, but series titles such as the *McGraw-Hill Series in Nuclear Engineering* are not.

IDENTIFICATION FIELDS AND CODES

The purpose of this document is to provide descriptive cataloguers with standard elements to include in bibliographic level ‘S’ of the INIS record. These elements include field (tag) 229 (full journal title), 320 (ISSN)² and 321 (CODEN)³. The full journal title is mandatory, and either the ISSN or the CODEN must be included (both may appear). Instructions on how to use this and other elements of the INIS record format are found in *INIS: Guide to Bibliographic Description* (IAEA-INIS-1).

ARRANGEMENT

In order to help the user find titles easily, the list is arranged in such a way that all journals are grouped under the name of the country or international organization responsible for their input in INIS, then sorted alphabetically by title. This is followed by summary statistics in the Appendix.

NEW JOURNAL TITLES

If input is submitted from a journal that does not appear in the *INIS List of Journal Titles*, it is necessary to provide the INIS Secretariat with a copy of the cover page, title page and/or any other editorial pages that show the journal’s title and the publishing information, including the ISSN, if present. This information is used to update the list.

The INIS Secretariat wishes to thank the national INIS Centres for their contribution to INIS and the maintenance of the *INIS List of Journal Titles*. Any comments or suggestions for improvements to this document should be addressed to:
