

Objectives

The purpose of the symposium is:

- To provide information and to share knowledge on modern and novel technologies in animal production and health, and their application to support sustainable livestock production systems.
- To discuss the constraints, opportunities and advantages for the effective transfer of nuclear and nuclear derived/related technologies.
- To identify capacity and research needs and to address gaps and new opportunities for transferring technologies and building capacities for ameliorating or solving factors that are limiting livestock productivity and causing animal diseases, particularly but not exclusively, in developing countries.
