

IRRS Good Practices

Responsibilities and Functions of the Government (Module 1)

Provision for Technical Services

Chile - Initial Mission (January 2018)

Mission Date: January 2018

Good Practice

Chile developed the technical capability to perform biological dosimetry in case of overexposures.

Observation

Biological dosimetry was available in Chile.

Basis

RS-G-1.1¹ para. 7.18 states that “*Only at doses much higher than the dose limits (i.e. 0.2–0.5 Sv or higher) will special dose investigations involving biological dosimetry... be necessary.*”

IAEA Comments/Highlights

No comments or highlights on this good practice.

¹ IAEA Safety Standards Series n°. RS-G-1.1, “Occupational Radiation Protection”, was superseded in 2018 by IAEA Safety Standards Series n°. GSG-7, “Occupational Radiation Protection”.
