

Exhibition Opportunities

The International Atomic Energy Agency (IAEA) is organizing an International Conference on Nuclear Power Plant Life management (PLiM) in Vienna, Austria, from 28 November to 2 December 2022. Approximately 300 participants from IAEA Member States and invited international organizations are expected to attend this event. These include representatives from utilities, research and design organizations, regulatory bodies, manufacturing and service companies, as well as government decision makers concerned with near, medium and long-term energy needs.

The purpose of the event is to emphasize the role of PLiM programmes in assuring safety and improving reliable operation of existing and new nuclear power plants (NPPs). Economic impacts of PLiM and long-term operation (LTO) programmes are included in the scope as is the role of innovation. Furthermore, national and international policies, and regulatory practices will be discussed. Finally, lessons learned from managing NPP PLiM during the global pandemic will be shared. Additional information may be found at the conference website:

<https://www.iaea.org/events/plim-5>.

For interested organizations, **there is the option to exhibit in person, virtually or both:**

- Each in person exhibitor will be provided with, free of charge, an exhibition space of 6m² (3x2m) including one table (80x160cm) and 2 chairs. Alternatively, professional booths with walls can be rented from an outside company.
- Virtual exhibitors are responsible for developing their own website, videos or virtual exhibitions. A pre-recorded corporate/institutional video could be used. The IAEA will only request a weblink (with no secondary login) to the end product to upload it to the IAEA Conference and Meetings App.

Companies and Organizations wishing to take advantage of the opportunity to exhibit are **encouraged to make a voluntary contribution to the IAEA in support of the event**. Any contribution would be utilized to financially support scientists from developing countries to attend the event or other costs directly related to the organization of the event. With the organization's permission, an acknowledgement of the voluntary contribution will be made at the event website, the IAEA Meetings and Conferences Mobile Application, and other appropriate venues.

In addition, to demonstrate its commitment to sustainability, the IAEA will organize this event as a green meeting according to the guidelines of the Austrian Ecolabel.

https://www.umweltzeichen.at/site/assets/files/1122/kurzinfo_green_meetings_englisch-1.pdf

This means that the IAEA will keep the ecological impact of this event as low as possible. There will be a focus on the areas of paper smart documentation, waste reduction and recycling, and environmentally friendly catering.

Exhibitors are encouraged to choose environmentally friendly options when planning their participation such as avoidance of mass distribution of flyers or other printed materials, hand out printed materials only upon request, or give preference to electronic information transfer (e.g. indication of links for download, etc.). If giveaways cannot be avoided, products made of durable and/or reusable environmentally sound materials (domestic wood, natural fibres) without synthetic individual packaging, without batteries, from fair trade, or with certified quality seals are preferred.

Further details on logistical arrangements and on the sustainability requirements of the Austrian Ecolabel certification will be shared with confirmed exhibitors at a later stage.

To explore exhibiting options further, please inquire to PLiM-5@iaea.org before **1 August 2022**
