

Massimo Garribba

European Commission, Nuclear Energy, Safety and ITER, Vienna, Austria

Massimo Garribba is the current Director of Nuclear Energy, Safety and ITER with the European Commission, Directorate-General for Energy. Receiving his Ph. D. from Padova University, Dr. Garribba went on to become the assistant to the Director in charge of strategy and political programming at the DG Information Society of the European Commission which then led him to become the Head of the eContent programme, a community programme to support the production of digital content by small and medium size enterprises. In 2004 Dr. Garribba then moved to the DG for Energy of the European Commission as the Head of the Unit for Euratom Coordination and International Relations. He was responsible for the post-Fukushima nuclear “stress tests” dossier as well the adoption of the Euratom nuclear safety directive and its subsequent implementation. His main responsibilities today include: legal issues, supervising the EU's contribution to the international ITER nuclear fusion project; Euratom's international relations; economic analysis of the nuclear fuel cycle; implementation of the EU Directives on nuclear safety, on the basic safety standards, and on the management of spent fuel and radioactive waste; follow up of the EU's nuclear safety stress tests.
