Eighth regular session

Agenda item 10
(GC(VIII)/285)

GENERAL DEBATE AND REPORT OF THE BOARD OF GOVERNORS FOR 1963-64

Draft resolution submitted jointly by Afghanistan, Algeria,
Cameroon, Ceylon, Congo (Leopoldville), Gabon, Ghana,
Indonesia, Nigeria, Saudi Arabia, Senegal, Tunisia,
the United Arab Republic and Viet-Nam

SCIENTIFIC TRAINING FOR NATIONALS OF THE DEVELOPING COUNTRIES

The General Conference,

- (a) Considering that the developing countries are suffering from a serious dearth of scientific and technical personnel, and particularly specialists in atomic energy,
- (b) Considering further that during the general debate at its eighth regular session a number of speakers drew the Conference's attention to this regrettable situation,
- (c) Noting that the Agency is making increased efforts to provide a remedy,

Requests the Board of Governors and the Director General:

- (a) To devote particular attention to the problems of providing training in nuclear science and technology in the developing countries;
- (b) To examine, with this in mind, the possibility of convening under the auspices of the Agency, as soon as practicable, a meeting whose purpose would be to study the training of specialists in nuclear science and technology in the developing countries; and
- (c) To report on this subject to the General Conference at its ninth regular session.
