

Dominique Le Guludec

University Paris 7, France

With her Ph.D. in Biophysics, Dominique Le Guludec is a Professor of Biophysics and Nuclear Medicine at the University Paris 7. She serves as the Head of the Department of Nuclear Medicine, which continues to develop vital progress in the field of nuclear medicine, particularly in regards to functional and molecular imaging for cardiovascular diseases as well as other areas. Dr. Le Guludec has international expertise in molecular imaging and has authored more than 165 articles in high ranking journals. She is the head of the Inserm Research Group “Cardiovascular Imaging” within the Bichat INSERM U1148 – Laboratory for Vascular Translational Science (LVTS) and of the pre-clinical multi-modality imaging platform UMS 34. She has been the director of the board of IRSN since 2013, and Director of the medical board of the hospital group HUPNVS-APHP-Paris. She was distinguished as «chevalière de la légion d’honneur» in 2014.
