

## **Mduduzi NN Mbuya**

**Global Alliance for Improved Nutrition (GAIN), Washington D.C., U.S.**

Mduduzi NN Mbuya is a Senior Technical Specialist (Monitoring, Learning and Research) with the Global Alliance for Improved Nutrition (GAIN), where he provides support to GAIN's research, evaluation and learning efforts with particular emphasis on large scale food fortification. He has 20 years of experience working across a breadth of health and nutrition areas, working with multidisciplinary teams, and across the continuum from research to policy. He has led and supported the design, implementation and analysis of large scale programs and program evaluations in Zimbabwe, Haiti, Bangladesh and India. He is a co-investigator on the Sanitation/Hygiene Infant Nutrition Efficacy (SHINE) trial in Zimbabwe, which is testing the independent and combined effects of WASH and Nutrition on stunting, and is motivated by the hypothesized central role of environmental enteric dysfunction in the etiology of stunting and anemia. He holds a BSc in Nutrition from the University of Zimbabwe and a Ph.D. in International Nutrition from Cornell University, U.S. and has authored over 30 papers in peer reviewed literature.
