Fax (043-1) 280 56 87

№ 3135н

The Permanent Mission of the Russian Federation to the International Organizations in Vienna presents its compliments to the Secretariat of the International Atomic Energy Agency and has the honour to inform on the following.

On 28 July 2023, at 16:00, a street block was damaged in course of a Ukrainian terrorist attack against the city of Taganrog. That block was the place where the State Unitary Enterprise of Rostovskaya Oblast "Centre of Medical Rehabilitation №1» housing a Radon laboratory is situated.

During investigation at the facilities of the mentioned laboratory specific attention was payed to examination of integrity of the generating room and, in particular, the Radon generator itself. The results of the undertaken activities showed that no damage had been inflicted to the generator, the valves' interlock system and the vessel with the concentrated solution of Radon. The radiation background remains normal.

The Permanent Mission of the Russian Federation requests the Secretariat to circulate this information among all IAEA Member States as soon as possible.

The Permanent Mission of the Russian Federation avails itself of this opportunity to renew to the IAEA Secretariat the assurances of its highest consideration.
