The Permanent Mission of the Russian Federation to the International Organizations in Vienna presents its compliments to the Secretariat of the International Atomic Energy Agency and has the honour to inform on the following.

At 10:20, November 4, 2023, Ukrainian nationalist troops undertook an attack with an unmanned aerial vehicle (UAV) against the apartment building in the town of Energodar (address: Naberezhnaya street, 24).

As a result of the strike the windows in the apartment building were broken out. According to preliminary information, there were no casualties.

The town of Energodar is a satellite town of the Zaporozhskaya NPP where the plant employees and members of their families live. The terrorist act of the Ukrainian side is an act of pressure against the plant personnel and contradicts the third of seven “indispensable pillars” of ensuring nuclear safety and security during armed conflicts outlined by the IAEA Director General R.Grossi in March 2022.

The photos of the consequences of the strike are attached to this Note Verbale.

The Permanent Mission of the Russian Federation requests the Secretariat to circulate this information among all IAEA Member States as soon as possible.
