

João V. Vitola

Quanta Diagnostica & Terapia, Curitiba, Brazil

João V. Vitola is a Cardiologist and Nuclear Physician in Curitiba, Brazil, trained at Vanderbilt University, U.S. In 1996 he received the Roentgen research award from the Radiological Society of North America (RSNA) for his early work with PET. A Ph.D. from the University of São Paulo, João V. Vitola is helping to pioneer hybrid stress – combining vasodilator and exercise. In 2004 he edited Nuclear Cardiology and Correlative Imaging (Springer – Verlag – NY) and in 2009 he co-edited Nuclear Medicine Imaging: A Teaching File (Lippincott Williams and Wilkins, Philadelphia). From 2014-2016, João V. Vitola served as Chair of the International Panel of ASNC. Since 2007 he has been a consultant for the International Atomic Energy Agency and has taken in numerous missions to promote nuclear cardiology in various countries.
